

Jose Joshua D. Quintanar

Full Stack LLM Development Analyst

joshuaquintanar17@gmail.com | <https://github.com/coffee-kernel/> | Philippines
(Remote-friendly)

Professional Profile

Full Stack LLM Development Analyst focused on building AI-assisted, data-driven software and reliable delivery workflows. Portfolio work spans LLM integration, risk mitigation recommendations, PostgreSQL data operations, computer vision, machine learning, serverless functions, and CI/CD security practices.

Technical Skills

Angular, C# .NET, PostgreSQL, LLM Integration, AWS, Azure DevOps, CI/CD, Security, .NET, SQL, Automation, Python, MS SQL, Computer Vision, Machine Learning, PHP, Bootstrap, Data Logging

Professional Experience

Full Stack LLM Development Analyst | Accenture Inc.

November 9, 2025–Present

- Designed and implemented an AI-driven recommendation engine for a risk platform using Angular, C# .NET, PostgreSQL, LLM Integration, and AWS.
- Built transactional PostgreSQL migration scripts with conflict-safe bulk updates across multi-table risk schemas.
- Built automated data load processes with serverless functions and CI/CD integration for reliable data handling.

Software Engineer | Wistron InfoComm Phils. Corp.

February 1, 2023–November 3, 2025

- Developed an automated defect inspection system using computer vision and machine learning to identify and classify defects in real time.
- Created a data logging application for capturing, storing, monitoring, and reporting large volumes of operational data.

Education

Bachelor of Science in Computer Science

Kolehiyo ng Subic | Class of 2022

Selected Projects

AI Recommendation Engine for Risk Platform

- Designed and implemented an AI-driven recommendation engine that surfaces risk mitigation suggestions in real time, cutting manual triage effort for analysts.
- **Technologies: Angular, C# .NET, PostgreSQL, LLM Integration, AWS**

Automated CI/CD Pipeline Hardening

- Rebuilt Azure DevOps pipelines with security gates, CSP header remediation, and automated release tagging to streamline safe, auditable deployments.
- **Technologies: Azure DevOps, CI/CD, Security, .NET**

Database Migration Toolkit

- Built transactional PostgreSQL migration scripts with conflict-safe bulk updates, resolving primary key violations across multi-table risk schemas.
- **Technologies: PostgreSQL, SQL, Automation**

Data Load Automation

- Built automated data load processes with serverless functions and CI/CD integration for efficient and reliable data handling.
- **Technologies: Python, AWS, PostgreSQL**

Automated Defect Inspection

- Developed an automated defect inspection system using computer vision and machine learning to identify and classify defects in real time.
- **Technologies: Python, MS SQL, Computer Vision, Machine Learning**

Data Logging Application

- Created a data logging application to efficiently capture, store, and manage large volumes of data with real-time monitoring and reporting capabilities.
- **Technologies: PHP, Bootstrap, MS SQL, Data Logging, Automation**

Security & Delivery

- Rebuilt Azure DevOps pipelines with security gates, CSP header remediation, and automated release tagging to streamline safe, auditable deployments.
- Technology areas represented in the portfolio: Azure DevOps, CI/CD, Security, and .NET.
